

# DOSING AND ADMINISTRATION

# CBD CANNA-PAL

14mg/ml CBD | 0.5mg/ml THC

## GRADUAL ORAL DOSING INSTRUCTIONS

### **Day 1 - Day 3**

Begin with **3-4 drops** once daily

### **Day 4 - Day 7**

**3-4 drops** in the morning (AM) and  
**3-4 drops** in the evening (PM)

### **Day 8 - Day 15+**

if you are seeing improvements and your pet is feeling normal, you can increase the dose to  
**1/4 dropper twice daily** (AM & PM)

### **Health improvements to look for:**

Improved **Sleep Patterns**  
Increased **Energy Levels**  
Reduced **Pain**  
Enhanced **Mobility**  
Greater **Appetite**

The main ingredient of the CBD Canna-Oil is Cannabinol (CBD). Our Cannabinoid receptors are an important system in establishing and maintaining human health. Cannabinoids are known to promote homeostasis at every level of biological life.

Please proceed slowly with dosing and always monitor your pet for normal behaviour including eating, drinking, sleeping habits etc.

\*This product has a long shelf life provided it is stored in a cool, dry place out of direct sunlight.
